1925	1,135	4,336	180,000§	1,119,000§

<sup>\*</sup> The following classes of accidents which are reported at the time of their occurrence to H.M. Divisional Inspectors of Mines, are included, viz.: (a) Accidents causing fracture of head or limb, or dislocation of limb, or any other serious personal injury; (b) Accidents caused by explosion of gas or dust, or any explosive, or by electricity, or by overwinding, and causing any personal injury whatever. The majority of these accidents involve a period of disablement extending to at least one week and are included in the next column.

†In 1924 and 1925 accidents which disabled the person injured for more than three days were reportable, the limit in earlier years being seven days.

‡In consequence of the national stop, age of work at coal mines, almost all the mines were idle for about three months in 1921.

§ Provisional figure.

[...] Great Britain only.
